Diabetic Ice Cream

Our diabetic ice cream is not intended to be an absolute alternatives to regular ice cream, but we have prepared it to a recipe which is more suitable for people with diabetes. We have lowered the fat content from around 11% to around 5% and replaced the sugar component with fructose, the natural fruit sugar, rather than using artificial sweeteners.

Whether you use our diabetic ice cream as a lower fat alternative or as a replacement for regular ice cream it should form part of your personal dietary plan. A full nutritional spec is listed below together with a comparison of our dairy ice cream.

We have 3 flavours in our diabetic ice cream, Vanilla, chocolate and strawberry. The vanilla is available in 2 and 1 litre together with a 100ml pot. Chocolate and strawberry are available in 1 litre tubs.
